The interdisciplinary Environment & Sustainability Program fosters understanding of the relationships between human societies and the natural, physical, and biological settings in which life on Earth exists. All three concentrations (B.A.) in the program integrate perspectives of the natural sciences, social sciences, and arts and humanities. Environmental Studies emphasizes natural sciences, Sustainability Studies emphasizes social sciences and humanities, and Environmental & Sustainability Studies is self-designed. Program curricula build on the unique definition of sustainability at UNCG, where “Academics, operations, and outreach are conducted with careful attention to the enduring interconnectedness of social equity, the environment, the economy, and aesthetics.”

Degree Outcomes
Graduates are prepared for a variety of career opportunities that require a broad range of knowledge about environmental and sustainability issues. Careers are available in environmental education, sustainability programs, recreation and tourism, environmental journalism, research, environmental activism and lobbying, and government and public policy. Employers include local, state, and federal agencies; business; and nonprofit organizations.

The Student Experience
Work with faculty from across campus to gather information about environmental problems from multiple disciplines, think critically about the causes of environmental problems, propose effective solutions, and communicate ideas clearly.
A flexible program that allows students to select courses related to their personal and career interests.
Research assistantships or opportunities to work closely with a professor on a research project.
Numerous pathways to a minor or major in other fields.
Opportunities to intern with organizations such as the Greensboro Science Center, National Park Service, Piedmont Land Conservancy, UNCG Sustainability Office, and more.
A student organization, UNC Green, dedicated to making UNCG more sustainable and environmentally friendly.
Support to participate in the Lloyd International Honors College and short- or long-term study abroad.
Accreditations & Affiliations
Association for Environmental Studies & Sciences
Association for the Advancement of Sustainability in Higher Education
National Council for Science and the Environment

ADDITIONAL REQUIREMENTS
The Environmental & Sustainability Studies concentration is available to students with a minimum 3.30 GPA after their junior year and is customizable in consultation with the adviser.
